Pan-Brick

Extendicare, Sudbury, Ontario. Canada

Get the quality and benefits of real brick, but with the extras that only Pan-Brick can offer!

Pan-Brick is light weight real brick siding which comes in panels. It goes up faster than full brick and gives you the lasting beauty and the real brick finish you demand. It's not a cheap imitation, but real fired clay, so it will pass the test of time. Whether you are doing accents or the whole building, you will enjoy years of maintenance free living with Pan-Brick. And as an added benefit it has an R-Value of R10, so it will keep your building cooler in summer and warmer in winter. That means your building will be more comfortable because the temperature will be more constant and your energy bills will be lower saving you money every month.

Benefits of using Pan-Brick:

- Increases your R value by R10, or 12 times the R-value of full brick, which means lower energy bills
- Stops thermal bridging which is the transfer of energy through the walls of your building
- Perfect for new construction or renovations
- Adds value to your home from the day it's installed, because it's brick
- Extremely durable because it is real brick, not vinyl
- Maintenance free
- Reduces noise
- Does not require a mason to install
- Integral mortar joint means no messy mortar
- 85% lighter than full brick so it needs no extra support
- Brick is timeless
